TechSafe Comply

A clear, tracked path to compliance with leading frameworks.

Who it's for

- CISO
- Compliance Manager
- Head of Legal & Risk

What it does

Flexible compliance services powered by Vanta, supporting 35+ global standards including ISO/IEC 27001, NIST, GDPR and SOC 2.

Key features

- Discovery phase to tailor your strategy
- Real-time progress on the Vanta dashboard
- Controls mapped to each framework
- Audit-ready evidence and reporting
- Full leadership visibility of milestones

Business outcomes

- **Continuous audit readiness**
- **Stronger customer trust**
- **Reduced regulatory risk**
- **Less manual effort**

ISO 27001 CERTIFIED

How TechSafe Comply keeps you audit-ready

Four steps that take you from discovery to continuous, audit-ready compliance.

1

Discover

A tailored strategy shaped around your requirements, timelines and resources.

2

Align

Map your controls to leading frameworks such as ISO/IEC 27001, NIST, GDPR and SOC 2.

3

Track

Follow progress and milestones in real time on a Vanta-powered compliance dashboard.

4

Assure

Demonstrate audit readiness and build trust with customers, partners and regulators.

Result: less audit effort, lower risk and stronger trust.

Use Case 1: Continuous Compliance Monitoring

Business Challenge

Compliance is treated as a once-a-year scramble, leaving controls untested between audits. This results in:

- Manual evidence collection
- Hidden control gaps
- Audit-time pressure
- Delayed customer deals

Who Cares?

- CISO
- Compliance Manager
- Risk & Governance Lead
- CIO
- Head of Technology

How TechSafe Helps

- Real-time compliance dashboard
- Controls mapped to frameworks
- Live progress and milestone tracking
- Clear visibility of gaps

Business Outcomes

- Continuous audit readiness
- Less manual effort
- Earlier risk detection
- Greater leadership confidence

ISO 27001 CERTIFIED

Use Case 2: Audit Evidence & Customer Assurance

Business Challenge

Customers and auditors expect proof of security controls, but evidence is scattered across teams and systems. This results in:

- Slow audit preparation
- Inconsistent evidence
- Stalled security questionnaires
- Delayed contract approvals

Who Cares?

- Compliance Manager
- Internal Audit Lead
- CISO
- Head of Legal & Risk
- CFO

How TechSafe Helps

- Structured path to certification
- Evidence aligned to each framework
- Progress reporting for leaders
- Support for ISO/IEC 27001 and SOC 2

Business Outcomes

- Faster, smoother audits
- Stronger customer trust
- Shorter sales cycles
- Clear executive reporting

ISO 27001 CERTIFIED

Use Case 3: Multi-Framework Regulatory Assurance

Business Challenge

Organisations must meet overlapping standards such as ISO/IEC 27001, NIST and GDPR, with limited resources. This results in:

- Duplicated effort
- Unclear priorities
- Contractual risk
- Rising consulting costs

Who Cares?

- Privacy Officer
- Head of Legal & Risk
- CISO
- CIO
- Vendor Risk Manager

How TechSafe Helps

- Support for 35+ global standards
- Strategy tailored in discovery
- Timelines matched to resources
- Transparent delivery tracking

Business Outcomes

- **Reduced regulatory risk**
- **Efficient multi-framework compliance**
- **Stronger contract position**
- **Predictable compliance roadmap**

ISO 27001 CERTIFIED

Key message: TechSafe Comply gives executive, operational and technical stakeholders a shared, real-time view of compliance progress, building trust with customers, partners and regulators.

Industries We Help

Healthcare

Safeguard sensitive patient data and demonstrate privacy compliance.

Professional Services

Show clients and partners robust information security controls.

Government

Align with security and privacy frameworks such as NIST and ISO/IEC 27001.

Finance

Meet regulatory and contractual security expectations with audit-ready evidence.

SaaS & Technology

Win enterprise deals with SOC 2 and ISO/IEC 27001 credibility.

Enterprise

Run consistent, multi-framework compliance across the organisation.

Why TechSafe Comply

Trust & Reputation

Demonstrate compliance to customers, partners and investors.

Stand out in competitive sectors such as government, finance, healthcare and SaaS.

Risk Mitigation

Find and fix vulnerabilities before they are exploited.

Reduce the likelihood of breaches, ransomware and operational disruption.

Regulatory & Contractual Assurance

Align with ISO 27001, GDPR, HIPAA and PCI-DSS requirements.

Be ready when enterprise clients ask for proof of controls.

TechSafe Comply is powered by Vanta, a trusted compliance platform supporting 35+ global standards including ISO/IEC 27001, NIST, GDPR and SOC 2.

Next Steps

Three steps to a clear, tracked path to compliance.

1

Book a discovery session

Share your frameworks, timelines and resources so we can tailor your compliance strategy.

2

Agree your strategy

Confirm scope, priorities and milestones aligned to your business and customer requirements.

3

Track in real time

Follow delivery on the compliance dashboard with full visibility for your leadership team.

Talk to the TechSafe team to start your compliance journey.
